

2/27/08 Operators Conference Call

Sent email for conference call 2/26

Present: Hugh Roarty, Bob Hess, Chris Jakubiak, Teresa Garner

Absent: Adam Houk

Hugh proposed 2 ways of managing the region.

1. Each operator would **monitor** all 26 sites on a weekly basis rotating once a month.
2. We would divide MARCOOS into 3 regions (Northern, Central and Southern) and each operator would be responsible for **monitoring** the sites in their region on a continuous basis.

Bob, Chris and Teresa all voted for option 2. So the sites in each region are shown in the attached table. **Monitoring** will entail logging into the site and troubleshooting remotely. If unsuccessful the operator will contact the site owner to arrange a site visit for more troubleshooting and repair. **Monitoring** also entails maintaining the proper operation of the site as well as ensuring the radial files make it from the remote site back to the central site as well as the National Network.

Teresa is going to work with Jeff Lee of NASA to implement her diagnostic plotting scripts to all the radials that are going into the NASA radial mirror site.

All MARCOOS sites should have "Chad's Warning Scripts" enabled by March 31, 2008.
